

BARRINGTON STRONG 10Oct22

We survived Hurricane Ian with minimal damage to our buildings. Some shutters came down and fascia on one building is damaged.

Manny, of Classic Lawns was here bright and early cleaning up the large debris and bringing it to the front where the County will pick it up.

Molter will have to come later for the smaller landscape issues.

The fence did not sustain damage!

Charles has been cleaning out the waterscape and Manny will remove large branches to the front.

Butch was here yesterday cleaning the pool and shocked it. Garbage and Recycling is on schedule.

At 4:00 a.m. power was restored along with internet and cellular.

During the Hurricane we continued to have water and thankfully the temperature was much cooler than usual. Many of us would meet by the barbecue. Thank you all who were here for looking out for each other. What a wonderful community.

I will post the photos I do have and if anyone has more of Barrington, please send them to me.

Unfortunately, our beaches sustained much damage especially from storm surge. Both PB restaurants were

significantly damaged, and owners are prohibited from access. Please stay tuned to Foundation updates for further information on PB Foundation assets and amenities.

Please message the Board or Sandy with questions.

With Gratitude,
The Board
